## Notice of Possible Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there may be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <a href="http://www.uspto.gov/main/howtofees.htm">http://www.uspto.gov/main/howtofees.htm</a>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of any fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

### **DETAILED ACTION**

1. The following is an examiner's statement of reasons for allowance:

The combination of limitations including: "servicing requests for delivery of a media content file in a network of client-server computing systems in which a client computer makes an inquiry to an origin server to locate a media server associated with the origin server which stores the media content file, and wherein a local media cache is located within the network, the method comprising the steps of: at the client, requesting delivery of the media content file by requesting from the origin server the delivery of a media redirection file (MRF) containing a redirection object specifying instructions for obtaining the media content file from the media server; prior to delivery of the media redirection file from the origin server to the client, intercepting the media redirection file at a node on the network between the origin server and client; rewriting instructions contained in the intercepted media redirection file; and sending the media redirection file including rewritten instructions to the client so that the media content file is obtained from the local media cache by the client instead of from the media server." is not found in the prior art of record. These limitations are recited in independent claim 1.

The combination of limitations including: "servicing requests for delivery of media content in a network of client-server computing systems, the method comprising the steps of: transmitting a request from a client to a first server over the network; in response to receiving the request, generating a file at the first

server, the file including information indicating an address for retrieving media content associated with the request from the client; sending the file over the network for receipt by the client; prior to receipt of the file by the client, intercepting the file at a node of the network; modifying the file at the node of the network; and forwarding the modified file to the client" is not found in the prior art of record. These limitations are recited in independent claim 14.

The combination of limitations including: "servicing requests for delivery of media content in a network of client-server computing systems, the method comprising the steps of: at an origin server that generates media redirection files, receiving a request from a client for information related specific media content; maintaining at least one media cache connected to the network to satisfy the request for media content, the at least one media cache including a copy of the media content that is optionally provided by an alternate media content server; selecting one of the at least one media cache to service the client request; generating a media redirection file to include an address of the selected media cache that will provide data to satisfy the request for media content; and sending the generated media redirection file to the requesting client" is not found in the prior art of record. These limitations are recited in independent claim 24.

Dependent claims 2-13, 15-23, and 25-35 incorporate the listed limitations by reference and contain limitations that further distinguish over the art of record. For these reasons, claims 2-13, 15-23, and 25-35 are considered allowable over the art of record.

Art Unit: 2177

Yates et al (USP 6167438) teaches "A technique for automatic, transparent, distributed, scalable and robust caching, prefetching, and replication in a computer network that request messages for a particular document follow paths from the clients to a home server that form a routing graph. Client request messages are routed up the graph towards the home server as would normally occur in the absent of caching. However, cache servers are located along the route, and may intercept requests if can be in service" – the abstract. Bauer does not fairly suggest intercepting an MRF file from an origin server and modifying instructions therein.

### Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statements of Reasons for Allowance."
